

Urban Garden Coalition

Recently formed in March 2017, the Urban Garden Coalition seeks to “unite gardens, groups, and individuals to collaborate and share resources to help build a stronger local food system. Remembering our region's heritage of neighborhood victory gardens and family farms, we draw on this collective strength to address food security challenges within our community. By promoting urban gardening in our region, UGC strengthens community networks, promotes healthy eating, encourages environmental stewardship, increases food system resilience, and empowers youth to plant the seeds of our future.”

**Come join us every 4th Tuesday of the month from 5:30-6:30pm
at our garden meeting locations to learn more!**
